2 Drum Bunded Spill Deck

Our 2 Drum Bunded Spill Decks are a high quality secondary containment bund perfect for use where hazardous liquids are handled and stored. Their low profile height provide easy access for frequent loading and unloading making this also a great choice for dispensing & collecting liquids ensuring drips and spills are contained. Made from HDPE they are resilient to corrosion, oils, hydrocarbons and strong chemicals. With sump capacity to 120L, batteries and smaller containers may be stored however for storage of 200L drums please consider the 2 or 4 Drum Bunded Spill Pallet or 4 Drum Inline Bunded Spill Pallet Set.

A removable grate provides quick access for identifying leaked fluid and retrieval from the sump. A sunp plug outlet is also featured. the high visibility yellow

construction of the bund is built tough and is capable of a static load of 1300kg and also provides 2 way entry for a Forklift or Pallet Jack. Weighing in at just 22kg, these nestable 2 drum Bunded Spill Decks provide an economical secondary containment solution, complimenting environmental and OH&S site requirements. Contact SEPMAR for further information about this product and others in our range.
